*Due to Oregon's wet weather, the use of a spreader sticker will assure better results when spraying.  
Read product labels to determine best days of use.*

### What are these products?

**Copper Spray:** An organic fungicide for disease control while the plant still has its foliage.

**Dormant Spray:** An organic insecticide for control of most insects, their eggs & mites.

**Lime Sulphur:** An organic fungicide for control of certain diseases.

**Spreader Sticker:** A product that allows the applied control to better spread & stick to the foliage. The longer the product stays on the foliage, the better the results.
